

**Assignment -2**  
Python Programming

Assignment Date	20 September 2022
Student Name	Mr.B.Anandhakrishnan
Student Roll Number	621319106302
Maximum Marks	2 Marks

**Question-1:**

Build a python code, Assume u get temperature and humidity values ( generated with random function to a variable ) and write a condition to continuously detect alarm in case of high temperature.

```
import random
import time
while(True):
    temp = round(random.uniform(10,50),1)
    print("Temperature : "+str(temp))
    humidity = random.randint(0,100)
    print("Humidity : "+str(humidity)+"\n")
    if(temp > 36.5 and temp < 37.5):
        print("Low Body Temperature")
    else:
        print("High Body Temperature")
    if(humidity > 30 and humidity < 60):
        print("Low Humidity")
    else:
        print("High Humidity")
    if((temp > 36.5 and temp < 37.5) and (humidity >
30 and humidity < 60)):
        print("All is good")
    time.sleep(1)
```

**Output :**

 IBM Assignment-2.py - H:\python\IBM Assignment-2.py (3.9.13)
