## Assignment -2

## **Python Programming**

Assignment Date	20 September 2022
Student Name	Mr.M.kishor
Student Roll Number	621319106044
Maximum Marks	2 Marks

## Question-1:

Build a python code, Assume u get temperature and humidity values (generated with random function to a variable) and write a condition to continuously detect alarm in case of high temperature.

```
import random
import time
while(True):
  temp = round(random.uniform(10,50),1)
  print("Temperature : "+str(temp))
  humidity = random.randint(0,100)
  print("Humidity : "+str(humidity)+"\n")
 if(temp > 36.5 and temp < 37.5):
    print("Low Body Temperature")
  else:
    print("High Body Temperature")
 if(humidity > 30 and humidity < 60):
    print("Low Humidity")
  else:
    print("High Humidity")
  if((temp > 36.5 and temp < 37.5) and (humidity >
30 and humidity < 60)):
    print("All is good")
  time.sleep(1)
```

## Output:

```
BM Assignment-2.py - H:\python\IBM Assignment-2.py (3.9.13)
```
